

**TRICLOVER END CAVITY
FILLED BALL-VALVE
HYGIENE APPLICATION**

- Special Cavity Filled design ensures no entrapment of Media between Body & Ball of valve; thereby ensuring clean internals
- Valve Internals are machined to extent of achieving high surface finish in range of 0.1 to 1.6 microns & Externals Electro polished
- Triclover end connection enables ease in maintenance
- Additionally Segmented Ball can be provided which ensures no Media - retention inside Ball-cavity provided Valve is mounted in Vertical orientation
